CONTENTS OF VOLUME XXXVII.

NUMBER I

	PAGE
The Occipital Bone in Otology and Rhinology. By ERNEST DE WOLFE WALES, M.D. (With two illustrations on Text-Plates I. and II.)	1
Headache Caused by Pathologic Conditions of the Nose and its Accessory Sinuses. By GERHARD H. COCKS, M.D., and JOHN E. MACKENTY, M.D.	5
The Value of the Leucocyte Count in the Diagnosis of Acute Inflammatory Disease. By FREDERIC E. SONDERN, M.D.	17
The Value of Bacteriological Investigations in Otology with Special Reference to Blood Cultures. By E. LIBMAN, M.D.	22
A Case of Mastoiditis in an Infant, with Some Interesting Features. By JAMES F. MCCAW, M.D., Watertown, N. Y.	33
I.—Royal Society of Medicine (Otological and Laryngological Sections). <i>Journ. of Laryngology, etc.</i> , 1907, xxii., p. 421	36
II.—Educational Treatment of the Deaf in All Stages of Impaired Hearing to the Totally Deaf. <i>Journ. of Laryngology, etc.</i> , 1907, xxii., p. 428	37
III.—Observations on the Determining Cause of the Formation of Nasal Polypi. <i>Journ. of Laryngology, etc.</i> , 1907, xxii., p. 517	38
Reports of Societies:	
1. Report of the Transactions of the Section on Otology, New York Academy of Medicine. Meeting of November 8, 1907.	39
DUEL: An operation for the correction of protruding ears, 39. SONDERN: The value of the leucocyte count in acute inflammatory disease (published in full in this issue), 41. LIBMAN: Value of the bacteriological examination in otological diseases (published in full in this issue), 41	
Meeting of December 13, 1907. HASKIN: A case of nature's radical operation for mastoid disease, 53. MCCAW: A case of mastoiditis in an infant, with some interesting features (published in full in this issue), 53	
Meeting of January 10, 1908. BRYANT: A case of streptococcus encapsulatus aural infection and modified radical mastoid operation, 69. RANDALL: "Do certain ear diseases tend to lateralize to the right or left?" 75	

	PAGE
2. Report of the Transactions of the New York Otological Society. By Dr. T. J. HARRIS, Secretary. Meeting of November 26, 1907	84
LEWIS: Osteoma of the external auditory canal, 84.	
BRYANT: Specimen of the temporal bone and the corresponding cerebral hemisphere, 84. DENCH: Case of brain abscess cured by operation through the tympanic roof, 86.	
3. Report of the Transactions of the Chicago Laryngological and Otological Society. Meeting of November 12, 1907.	88
FISKE: A case of abscess of the neck for diagnosis, 88.	
FRIEDBERG: A case of foreign body in the larynx for two and a half years, 88. BECK: A case of healed primary nasal tuberculosis, 89. BECK: Radiography in the nose, throat, and ear, 90. SHAMBAUGH: Case of labyrinthine deafness with preserved island of hearing, 91.	
Meeting of December 10, 1907. INGALS: Intranasal drainage of the frontal sinus, 93. MARQUIS: A demonstration of new instruments devised by Killian for use in bronchoscopy and œsophagoscopy, 95. CORWIN: A case of sarcoma of the root of the tongue with demonstration of microscopic section, 95.	

NUMBER 2

Report of Two Cases of Sinus Thrombosis Complicated by Cerebral Abscess in the Temporo-Sphenoidal Lobes. By Dr. WILLIAM R. DABNEY, Marietta, Ohio. (With two charts on Text-Plate III.)	97
A Case of Acute Internal Hydrocephalus Secondary to Streptococcal Infection of the Labyrinth. By SYDNEY R. SCOTT, M. S. London, F. R. C. S. England	108
A Case of Mastoiditis with Brain Complications. By FRANK KNAUSE, M.D. (With temperature chart on Text-Plate IV. and specimens of handwriting on Text-Plate V.)	116
Report of a Case of Meningitis of Otitic Origin; Operation; Recovery. By PHILIP D. KERRISON, M.D.	122
The "Piano-String" Theory of the Basilar Membrane. By W. SOHIER BRYANT, A.M., M.D., New York	127
Sarcoma of the Middle Ear. By ALEXANDER ZEBROWSKI, M.D.	130
A Case of Large Cholesteatoma of the Middle Ear and the Posterior Cranial Fossa, Cured by Radical Operation. No Recurrence after Eight and One-Half Years. By C. ZIMMERMANN, M.D., Milwaukee, Wis. (Demonstrated before the Medical Society of Milwaukee County, March 8, 1907.)	137

Reports of Societies:

1. Report of the Transactions of the New York Otological Society. By THOMAS J. HARRIS, M.D., Secretary. Meeting of January 28, 1908. 146

PHILLIPS: Epithelioma of the ear, 146. DENCH: Epithelioma, 146. DENCH: Fibro-sarcoma of the middle ear, and small-cell sarcoma involving the middle ear and mastoid, 147. HASKIN: Epithelioma of the ear, 147. BERENS: Endothelioma of the auditory canal, 147. BERENS: Mastoiditis, 147. DENCH: Mastoiditis with occipital fistula, 147. GRUENING: Double mastoiditis with perforation of the zygoma, 147. LEWIS: Aseptic aural irrigating outfit, 147. DENCH: Sinus thrombosis in children, 148.

Meeting of March 24, 1908. BRYANT: Chronic middle-ear suppuration, 153. GRUENING: Fatal case of mastoiditis complicated by thrombosis of all sinuses of the head, 153. MCKERNON: Case of Stacke operation, 154. DENCH: Wisdom of removing granulation tissue in ambulatory patients, 155. HARRIS: Acute mastoiditis complicated by sinus thrombosis and meningitis, 155. DENCH: Plastic operation, 157. LEWIS: Primary mastoiditis, 157.

2. Report of the Transactions of the Chicago Laryngological and Otological Society. Meeting of February 11, 1908. 158

WILSON: Some points in the anatomy of the frontal sinus, 158. GOOD: An intranasal method for opening the frontal sinus, 158.

3. Report of the Transactions of the Section on Otology of the New York Academy of Medicine. Meeting of February 14, 1908. 162

BRYANT: A new electric motor for cranial surgery (with illustration on Text-Plate VI.), 162. HASKIN: New electric light bulb (tantalum light), 163. GRUENING: Case of carcinoma springing from the external canal, 164. HASKIN: Four cases of ossiculectomy, 166. MCAULIFFE: Case of objective tinnitus due to convulsive tic of the tensor and levator palati, 170. KERRISON: Case of meningitis of otitic origin; operation; recovery, 173. KNAUSE: Case of cerebral abscess with aphasia, 174.

Abstracts:

- A case of chronic middle-ear suppuration with necrosis of the posterior labyrinth, facial paralysis, large parotid swelling, and pus tracking down behind the jaw to the soft palate and tonsils. By ARTHUR H. CHEATLE 177

- Infantile types of mastoid, with ninety-six specimens. By ARTHUR H. CHEATLE. 178

	PAGE
On the differential diagnosis between Ménière's disease and other cases exhibiting Ménière's complex of symptoms, with remarks on the practical value of the seton. By T. WILSON PARRY.	178
Four rather unusual cases of acute mastoiditis. By Dr. MATTHEWSON	179
Meningism. By Dr. TYLECOTE.	179
Polypoid overgrowth of the inferior turbinate. By HAMILTON WHITE, M.D.	179
Sarcoma of the nose. By Dr. WALKER DOWNIE	180
The naso-pharynx as infection carrier in an epidemic of cerebro-spinal meningitis. By Dr. FRASER and Dr. COMRIE	180
A case of retro-pharyngeal fibroma. By N. B. ODGERS, M.D.	181
On lymphoid degeneration of the salivary glands. By S. HANDLEY, M.D.	181

NUMBERS 3 AND 4

Report of a Case of Mastoiditis, Complicated by Purulent Meningitis, Encephalitis, Phlebitis of Sigmoid Sinus, Jugular Bulb, and Internal Jugular Vein. Operation. Recovery. By JAMES F. MCKERNON, M.D. (With temperature chart on Text-Plate VII.)	188
Report of Cases of Mastoiditis in the Aged. By HENRY A. ALDERTON, M.D.	190
Double Mastoiditis, Sigmoid-Sinus and Jugular Thrombosis. By SEYMOUR OPPENHEIMER, M.D. (With temperature chart on Text-Plate VIII.)	197
Case of Recurrent Keloid of Scalp and Lobule of Ear. By GERHARD H. COCKS, M.D. (With Text-Plate IX.)	202
A New Instrument for the Treatment of Diseases of the Ear. By Dr. EDMUND PRINCE FOWLER, New York. (With two illustrations in the text.)	205
A Case of Sinus Thrombosis, Following Removal of Granulation Tissue from the Middle Ear. Excision of the Internal Jugular Vein. Recovery. By EDWARD BRADFORD DENCH, M.D.	211
Eustachian Catarrh with Hyperinflation; Report of a Case. By WILLIAM C. BRAISLIN, M.D.	215
Do not Remove the Thrombus! By Dr. F. VOSS of Riga. Translated by Dr. GERHARD H. COCKS, New York, from <i>Zeitsch. f. Ohrenhkk.</i> , Vol. LIII., p. 315	217

	PAGE
Foreign Bodies in the Nasal Cavity as a Cause of Maxillary Empyema. By Dr. G. KREBS, Hildesheim. Translated by Dr. GERHARD H. COCKS, New York, from <i>Zeitsch. f. Ohrenhkk.</i> , Vol. LIV., p. 141	226
Otitic Sinus Thrombosis and Pyæmia. By Dr. GUSTAV ALEXANDER, Chief of the Ear Department of the General Polyclinic in Vienna. Translated, with Permission of the Author, by Dr. GEO. E. DAVIS, New York, from the <i>Oesterreichische Aerztezeitung</i> , 1907. (With three text illustrations.)	230
Reports of Societies:	
1. Report of the Transactions of the New York Otological Society. By THOMAS J. HARRIS, M. D., Secretary. Meeting of May 22, 1908.	248
<p>CHEATLE: Chronic suppuration of the middle ear and mastoiditis which drained into the tonsil of the corresponding side, 248. MCKERNON: Case of ossiculectomy, 248. DENCH: Case of labyrinthitis, 249. PHILLIPS: Carcinoma of the ear, 251. GRUENING: Mastoiditis with sinus and vein thrombosis and numerous metastatic abscesses, 251. JANSEN: Carcinoma of the labyrinth, 252. BRYANT: Meningeal hernia, 253.</p>	
2. Report of the Transactions of the Chicago Laryngological and Otological Society. By Dr. GEORGE E. SHAMBAUGH, Secretary. Meeting of March 10, 1908.	254
<p>BECK: Laryngeal obstruction, 254. BECK: Sinus thrombosis, 254. FREER: Tabic laryngeal crises, 256. KAHN: Subjective sensations of smell and their significance, 259. STUBBS: Perfected Gottstein curette, 260.</p> <p>Meeting of April 14, 1908. RHODES: Xanthoma, 262. SHAMBAUGH: Tubercular laryngitis, 262. PIERCE: Case of chronic suppurative otitis media with thrombosis of the lateral sinus and jugular bulb, 262. GRADLE: Calculus removed from duct of submaxillary gland, 264. BRAWLEY: Headache due to non-suppurative frontal sinusitis, 265. GROSVENOR: Chondroma and osteoma in the faucial tonsils, 266.</p> <p>Meeting of May 12, 1908. PIERCE: Maxillary cysts of dental origin with report of a case, 267. BECK: Dentigerous cyst, 267. BOOT: Non-suppurative labyrinthine disease occurring in the course of mumps, 269. ANDREWS: Case of spontaneous tympano-mastoid exenteration, the result of suppurative otitis media, 271. HOLINGER: Differential diagnosis between involvement of the labyrinth and hysteria in a case of double suppurative otitis media, 273.</p>	
3. Report of the Transactions of the Section on Otology of the New York Academy of Medicine. Meeting of March 13, 1908.	276

COCKS: Case of recurrent keloid of scalp and lobule of ear, 276. WHITING: The toxæmia of latent erysipelas in its relation to otitic serous meningitis, 276.

Meeting of April 10, 1908. SHEPPARD: Case of cholesteatoma, 284. FOWLER: A new instrument for the treatment of diseases of the ear, 287. OPPENHEIMER: Unusually atypical case of sinus thrombosis. Importance of blood culture in diagnosis, 288. ALDERTON: Cases of mastoiditis in the aged, 289. MCKERNON: Case of mastoiditis complicated by purulent meningitis, encephalitis, phlebitis of sigmoid sinus, jugular bulb, and internal jugular vein; operation; recovery, 289. DENCH: Case of sinus thrombosis following removal of granulations from the middle ear; excision of internal jugular vein; recovery, 290. SHEPPARD: Series of cases of mastoiditis with a great lack of symptoms, 292.

Report on the Progress of Otology during the Second Quarter of the Year 1907. By Prof. ARTHUR HARTMANN, Berlin. Translated by Dr. ARNOLD KNAPP. 295

Anatomy and physiology, 295; General, 303; External ear, 310; Middle ear, 311; Nervous apparatus, 321; Nose and naso-pharynx, 323; Palate, pharynx, and buccal cavity, 339.

Book Reviews 341

I. Principles and Practice of Modern Otology. By Dr. J. F. BARNHILL, Professor of Otology, Indiana University School of Medicine, and Dr. F. DE W. WALES, Associate Professor of Otology, Indiana University School of Medicine.

II. A Text-Book of the Diseases of the Nose and Throat. By Dr. D. BRADEN KYLE, Professor of Laryngology and Rhinology, Jefferson Medical College.

III. Diseases of the Nose and Throat. By HERBERT TILLEY, Surgeon to the Ear and Throat Department, University College Hospital, etc.

IV. The Labyrinth of Animals. By ALBERT A. GRAY, Aural Surgeon to the Victoria Infirmary, Glasgow. Volume II.

NUMBER 5

Some Points in the Surgical Anatomy of the Temporal Bone Bearing on the Spread and Cure of Suppuration. By ARTHUR H. CHEATLE, F. R. C. S., London. (With eight illustrations on Text Plates X.-XIII.) 343

Improvements of the Respirometer and its Disinfection. By CHARLES AUBREY BUCKLIN, A.M., M.D., New York. 365

The Increase of the Specific Gravity of Pus in Otitis Media Suppurativa Acuta as an Indication for Opening the Mastoid Process, and the Errors Connected with Hammerschlag's Method. By P. TETENS HALD, M.D., Copenhagen. Translated by Dr. GERHARD H. COCKS, New York, from <i>Zeitsch. f. Ohrenheilk.</i> , Vol. LIII., p. 281.	PAGE 370
---	-------------

Report of the Seventeenth Meeting of the German Otological Society at Heidelberg, June 6 and 7, 1908. By Dr. J. HEGENER, Heidelberg. Translated by Dr. PERCY FRIDENBERG, New York.	377
--	-----

O. KOERNER: Conservative treatment of chronic middle-ear suppuration, 377. SCHEIBE: What can we expect from conservative treatment of chronic middle-ear suppuration? 378. HEGENER: Measurement of high-pitched weak tones, 381. HEGENER: Suggestions for the determination of the upper tone limit, 382. BÁRÁNY: Deafening alarm for the detection of unilateral deafness, 383. KARL L. SCHAEFER and H. SESSOUS: Significance of the middle-ear apparatus for audition, particularly of low-pitched tones, 383. WANNER: Functional tests in congenital syphilis, 385. DENKER: Demonstration of three new ear-models, 386. SCHOENEMANN: Demonstration of five built-up models of the human ear, 387. POLITZER: The anatomical relations of the stapedial foot-plate in otosclerosis, 387. YOSHII and SIEBENMANN: Demonstration of experimental acoustic injuries of the ear, 388. SIEBENMANN and YOSHII: Specimens of circumscribed labyrinthitis, 389. ALT: Demonstration of microscopic specimens of labyrinthine suppuration and its sequelæ following epidemic cerebro-spinal meningitis, 389. MARX: Lesions of the labyrinth due to radiant energy, 390. RUTTIN: The question as to an ectasia of the cochlear duct, 390. R. NAGER: Demonstration of formation of labyrinthine sequestra in carcinoma of the middle ear, 390. FREY: Demonstration of microscopic specimens of developmental anomalies of the ear, 391. DENKER: Demonstration of a Bezold-Edelmann model of the tone-conducting mechanism of the ear, 391. VOSS: Clinical report on non-suppurative labyrinthitis in acute and chronic otitis media, 391. BLOCH: Etiology of ankylosis of the stapes, 393. MANASSE: Exostoses of the porus acusticus internus, 393. E. RUTTIN: Surgery of the temporal bone, 394. ALT: Operative treatment of otogenous facial paralysis, 394. LINDT: Case of rare localization of tuberculosis in the nose, 395. MARX: Demonstration of osteomata of accessory sinuses, 396. UFFENORDE: Two cases of subdural abscess, 397. MUELLER: Wound retractor for mastoid operations, 397. HARTMANN: Closure of retro-auricular openings by reclinaton of the concha, 397. VOSS: Demonstration of a

salpingoscope with attachment for catheter and bougie, 398.
KRETSCHMANN: Operative treatment of deformities of the nasal septum, 398. **UFFENORDE**: Pathologic and bacteriologic findings in a case of extensive parietal thrombus of the sinus, 398. **URBANTSCHITSCH**: Galvanic treatment of the ear, 400. **HERSCHEL**: X-ray examination in decalcification of temporal bones, 400. **HEGENER**: Thin celloidin sections through the temporal bone, 400.

Report on the Progress in Otology and Rhinology during the Third and Fourth Quarters of 1907. By Prof. **ARTHUR HARTMANN**, Berlin. Translated by Dr. **ARNOLD KNAPP**. . . . 401

Anatomy and physiology, 401; General, 402; External ear, 410; Middle ear, 412; Nervous apparatus, 428; Nose and naso-pharynx, 430; Soft palate, pharynx, and buccal cavity, 450.

NUMBER 6

The Membrana Tectoria and the Theory of Tone Perception. By **GEORGE E. SHAMBAUGH**, M.D., Chicago. (With four illustrations on Text-Plate XIV.) 457

A Case of Cerebellar Tumor Involving the Auditory Nerve. By **GEORGE L. BIGGS**, M.B., B.S. 468

Negative Pressure as a Therapeutic Agent in Diseases of Nasal Accessory Sinuses, Throat, Ear, and Mastoid. By Dr. **EUGENE RICHARDS LEWIS**, Dubuque, Iowa 471

Phlebitis without Thrombosis as a Cause of Obliteration of the Sinus in Children. By Dr. **S. KRAMM**, of Berlin. Abridged Translation by Dr. **GERHARD H. COCKS**, New York, from *Zeitschr. f. Ohrenhkl.*, Vol. LVIII., p. 3 488

The Treatment of Acute Middle-Ear Suppuration, with Nipple-Shaped Perforation, by Aspirating the Pus into the External Meatus. By Dr. **O. MUCK**, of Essen (Ruhr). Translated from *Zeitschr. f. Ohrenhkl.*, Vol. LVI., No. 1, 1908, by Dr. **M. J. BALLIN**, New York 496

Epidermic Cysts, Following Transplantation in the Cavity Produced by the Radical Mastoid Operation. By Dr. **W. SCHOETZ**, Heidelberg. Translated from *Zeitschr. f. Ohrenhkl.*, Vol. LVI., No. 1, 1908, by Dr. **M. J. BALLIN**, New York 501

	PAGE
Functional Examination of the Organ of Hearing in Deaf-Mutes. By G. ALEXANDER and G. W. MACKENZIE. Translated from <i>Zeitschr. f. Ohrenhkk.</i> , Vol. LVI., No. 2, 1908, by G. W. MAC- KENZIE, Philadelphia	507
On the Structure and Function of the Epithelium in the Sulcus Spiralis Externus. By Dr. GEORGE E. SHAMBAUGH. (With eight figures on Appended Plates A, B, C, D, and E).	538
Arterial Hemorrhage from the Auditory Meatus in a Child, after a Brief Attack of Otitis Media Acuta Following Tonsillitis with Tonsillar Abscess. Ligation of the Common Carotid. Un- eventful Recovery. By Dr. J. A. SPALDING, Portland, Me.	547
Two Cases of Sinus Thrombosis, with Atypical Symptoms; Operative and Pathological Findings. B. S. J. KOPETZKY, M.D., New York City	552
A Case of Unsuspected Necrosis of the Petrous Bone; Meningitis; Death; Co-existing Mastoid Suppuration and Extradural (Cerebellar) Abscess. By HILL HASTINGS, M.D., Los Angeles, Cal. (With one photograph on Text-Plate XV.)	558
Bacterial Suspensions in the Treatment of Aural Suppuration. By RAY CONNOR, A.B., M.D., Detroit, Mich.	564

Reports of Societies:

1. **Report of the Meeting of the Austrian Otological Society.**
By Dr ROBERT BÁRÁNY, of Vienna. Translated by Dr.
GERHARD H. COCKS, New York. Meeting of June 22, 1908 575
2. **Report of the Transactions of the Chicago Laryngological
and Otological Society. Meeting of October, 13, 1908.** By
Dr. GEORGE E. SHAMBAUGH, Secretary 587

BECK: Cyst of the Epiglottis, 587. BECK: Removed a
small electric lamp from left bronchus. BECK: Injected
large quantities of paraffin, 587. HOLINGER: Extensive
abscess involving the faucial tonsils, 588. HOLINGER: Post-
nasal growth, 589. SHAMBAUGH: Cholesteatoma causing
an erosion into the horizontal semicircular canal; the methods
for examining the vestibular apparatus, 589.

3. **Report of the Transactions of the Section on Otology, New
York Academy of Medicine. Meeting of October 9, 1908.**

KOPETZKY: Report of two cases of atypical sinus throm-
bosis, 593. VOISLAWSKY: Case of sinus thrombosis, 596.
MILLIGAN: The application of Arneth's blood charts in the
diagnosis of obscure mastoid conditions, 598.

Book Reviews	601
V. A Text-book of the Diseases of the Ear. By MACLEOD YEARSLEY, F.R.C.S., Senior Surgeon to the Royal Ear Hospital.	
VI. The Surgery of the Ear. By Dr. SAMUEL J. KOPETZKY.	
VII. Lehrbuch der Ohrenheilkunde für praktische Aerzte und Studierende (Text-book of Otology). By Professor A. POLITZER, Vienna.	
Index of Authors and Subjects of Vol. XXXVII.	603

EDITORIAL NOTICE.

The **Archives of Otology** is a bi-monthly journal, published in annual volumes of about five hundred pages each, extensively illustrated with cuts in the text, half-tone text plates, and lithographic plates, many in colors. About three-quarters of the space is devoted to original papers, and the remaining quarter to a systematic report on the progress of otology, and to reports of societies, book reviews, and miscellaneous notes. The papers and reports are original, and only accepted with the understanding that they are to be published in this journal exclusively. The original papers in the English edition appear in the German (*Zeitschrift für Ohrenheilkunde*) either in full or in more or less abridged translations, and *vice versa*. Any subscriber who wishes to refer to the original text of a translated or abridged paper may, by applying to the editor, obtain a reprint which he is expected to return after perusal.

The subscription price of the ARCHIVES OF OTOTOLOGY is \$4.00 per year, payable in advance. The price per number is 75c. The ARCHIVES is sent postage free in the United States, Canada, and Mexico.

The **Archives of Ophthalmology** is a companion journal of the ARCHIVES OF OTOTOLOGY with the following differences: The editors are Dr. H. Knapp of New York, and Dr. C. Hess of Würzburg. The title of the German edition is *Archiv für Augenheilkunde*, edited by Dr. H. Knapp and Dr. C. Hess. The bi-monthly numbers are issued alternately with those of the ARCHIVES OF OTOTOLOGY, beginning with January. The annual volumes contain about six hundred pages. Price, \$5.00; single number, \$1.00

CONTENTS OF VOLUME XXXVII., NUMBER I

	PAGE
The Occipital Bone in Otology and Rhinology. By ERNEST DE WOLFE WALES, M.D. (With two illustrations on Text-Plates I. and II.)	1
Headache Caused by Pathologic Conditions of the Nose and its Accessory Sinuses. By GERHARD H. COCKS, M.D., and JOHN E. MACKENTY, M.D.	5
The Value of the Leucocyte Count in the Diagnosis of Acute Inflammatory Disease. By FREDERIC E. SONDERN, M.D.	17
The Value of Bacteriological Investigations in Otology with Special Reference to Blood Cultures. By E. LIBMAN, M.D.	17
A Case of Mastoiditis in an Infant, with Some Interesting Features. By JAMES F. MCCAW, M.D., Watertown, N. Y.	22
I.—Royal Society of Medicine (Otological and Laryngological Sections). <i>Journ. of Laryngology, etc.</i> , 1907, xxii., p. 421	36
II.—Educational Treatment of the Deaf in All Stages of Impaired Hearing to the Totally Deaf. <i>Journ. of Laryngology, etc.</i> , 1907, xxii., p. 428	37
III.—Observations on the Determining Cause of the Formation of Nasal Polypi. <i>Journ. of Laryngology, etc.</i> , 1907, xxii., p. 517	38

Reports of Societies:

1. Report of the Transactions of the Section on Otology, New York Academy of Medicine. Meeting of November 8, 1907. 39

DUEL: An operation for the correction of protruding ears, 39. SONDERN: The value of the leucocyte count in acute inflammatory disease (published in full in this issue), 41. LIBMAN: Value of the bacteriological examination in otological diseases (published in full in this issue), 41

Meeting of December 13, 1907. HASKIN: A case of nature's radical operation for mastoid disease, 53. MCCAW: A case of mastoiditis in an infant, with some interesting features (published in full in this issue), 53

Meeting of January 10, 1908. BRYANT: A case of streptococcus encapsulatus aural infection and modified radical mastoid operation, 69. RANDALL: "Do certain ear diseases tend to lateralize to the right or left?" 75
